

## Web development group M8

### Site Guide:

The website defaults to opening to index.html (or the home page) which explains the goals of the website, what can be found on the website and how to use the website.

At the top of the webpage there is a Navigation bar which will display all accessible web pages.

By clicking on the ‘About’ button it will navigate the user to a page which provides a service level description about all 3 goals.

By clicking on the ‘Goals’ button, it will open a drop-down menu displaying the 3 links to the goal pages. By clicking on one it will take the user to that respective goals page and close the goals drop down menu.

By clicking on the ‘our newsletter’ button, it will take the user to a form page where they are able to fill in their personal details to sign up for the weekly newsletter. The user will also be able to add an additional message when they sign up for the newsletter. The newsletter can send a confirmation email, however the code submitted will be unable to do so as it requires one of our passwords to an email address and for obvious reasons, the password was not included. It will be demonstrated in person.

By clicking on the ‘our team’ button’ the user will be directed to a page with details about each team member and what they were responsible for in developing the web page.

Finally, by clicking the ‘Home’ button the user will be directed back to the index.html page they were on when initially opening the website.
